Obsolescence and Line-Down Avoidance

We realize that there will always be a need for older technology. Your company may need end of life or obsolete electronic components for various projects. Don't redesign your PCB at the waste of time and money. Spectrum Component Supply can help you obtain the parts that were originally intended in your design. Spectrum has always prided itself on its unparalleled ability to procure the most difficult items. Through our vast time test and ever growing resources, Spectrum Component Supply has great visibility over the global marketplace. Additionally, our customers and other OEMs give us exclusive listings of their inventory. We may be able to provide your company with products that no one else can find. Check with Spectrum Component Supply first, before going line-down.

OEM Solutions

Cable and PCB Assembly

Spectrum Component Supply offers full turnkey PCB assembly, and wire and cable harness assembly. Many of our customers enjoy the convenience of having a full service distributor that not only procures their components, but takes their project from concept to finished product, or any step in-between.

Added Value

- Turnkey Procurement
- Prototyping, small, medium and large volume
- In-Circuit and functional testing and support
- Competitive Pricing
- On time delivery
- ROHS and Non-ROHS solder
- 100% Visual inspection
- Consistent service and quality

Component Testing and Quality Assurance

In order to better serve our customers, we have teamed up with an AS9100C and ANSI/ESD S20.20.2007 certified, local laboratory. We can now offer the following value added services and quality assurance procedures.

- Tape and reeling
- Functional and electrical testing
- Programming, erasure and black verification
