

Our Commitment to You

1. Blanket order and stocking agreements for up to one year
2. Customer-ordered stock will be held in Bonded Inventory
3. Industry Leading Credit Terms
4. JIT Deliveries
5. Climate Controlled Warehouses
6. Eliminate Shortages and Line Down Situations
7. Spectrum's 37 years of friendly customer service, reliability, knowledge and care

Allow Spectrum Components to stock your most critical, high-volume components in one of its climate-controlled warehouses. Avoid costly delays due to long lead times, and bring down your part costs by buying in the greatest volume possible. Our customers can rest easy knowing that their parts remain safe in our bonded inventory. Spectrum will never sell your stock, regardless of market scarcity. Our industry-leading credit terms can help your business grow.

How Can We Cooperate

1. All blanket orders are NCNR. Spectrum is committed to hold all blanket agreements for up to one year. At the end of one year, the parts must be shipped.
2. It is up to the customer's discretion how many pieces, and when the parts will ship up to one year. We want you to have flexibility to meet your demand needs.
3. To beat the "Big Distributors" we need your help. Please let us know your target price. We only expect to win your business if we can offer a better price and service than your current supplier. Working with Spectrum Component Supply is a superior buying experience and customer service. We will work to fit your needs.
